Auswertung:
 Zählen Sie die Anzahl der positiven Messpunkte (Plaque/Blutung) und tragen Sie diese auf der oberen, waagrecht verlaufenden Linie ab. Anschließend gehen Sie in der ausgewählten Spalte nach unten, bis die Zeile der entsprechenden Anzahl der Zähne (links) gekreuzt wird. Da die Anzahl der Messpunkte aus Übersichtsgründen nur in 4er-Schritten aufgetragen ist, müssen Zwischenwerte interpoliert werden.
